## Engineered Excellence for Greener Classrooms

### Vertical Classroom Air Handler

The Change'Air standard "Air Handler" ranges from simple to complex depending on your application and the options you require. This typical chilled water/hot water or electric design can have options like factory installed valve packages, built in power relief, a gas furnace or many other standard upgrades. This series has our most versatile cabinet options to fit the most demanding applications. This classroom air handler is a popular choice for areas with high capacity demands to restricted space requirements.
